

The Janesville Daily Gazette.

VOLUME 25

Entered at the Post Office at Janesville, Wis., as second-class matter.

JANESVILLE, WISCONSIN, SATURDAY, JUNE 11, 1881.

Published Every Evening Except Sunday, at \$7 a Year.

NUMBER 81

The only "vindication" which the Republicans at Albany should be anxious to accomplish is to vindicate the principles of the Republican party.

Every chairman of every Republican State committee in the United States should telegraph the Republican members of the New York Legislature to go into a caucus, nominate two Senators, elect them, and go home.

The report that General Rusk would be a candidate for Governor, it is said by his friends to be untrue. He does not want it, and if he did would consider his chances for a nomination too small to justify him to enter the contest in the next State convention.

Men are getting crazy on the subject of stocks, and if the signs of the time do not fail, a good many capitalists will need a lunatic asylum before long. There is reckless speculation going on in all sorts of stock, and to show how booms have been created, it is only necessary to give one illustration. Before Mr. Cyrus W. Field started on his trip around the world a few months ago, he bought some western railway stock for \$6 a share, and after his return he sold it for \$62.50! These tremendous gains in stock make some men wild in buying, but the time will come when there will be a general tumble, and hundreds will be hurried into utter ruin.

A very singular case comes to light from Rhode Island. A woman died at the coal mines at Portsmouth, in that State, a few days ago, and after her death, her husband informed the overseer of the poor that in the attic of the house could be found his son, a maniac, who had been attended by his mother, and her only, for fifteen years. During that time the son had not seen any other person, and day by day, week by week, month by month, and year by year, she was his only guard. After fifteen years of unflinching devotion the mother died, and the father being unable to take care of his boy, the mania was taken to the State insane asylum. When found he was covered with dirty rags and a long growth of hair.

There is no doubt that the resignation of Secretary Blaine would do much to harmonize the Republican party. He is a man of great abilities, wonderfully energetic, exceedingly brilliant, intensely courageous, and always ready for a fight. He never wants to lose an opportunity to use that "shining lance." Some times he does not do it discreetly, and like Mr. Conkling, frequently gets into trouble with the leading members of his own party. While we are inclined to believe the President, that Secretary Blaine had nothing to do with the nomination of Judge Robertson, yet the experiences of the past three months go to prove that a man of his general make-up is not best fitted for a cabinet position, especially for that of Secretary of State, which in influence, is almost equal to the presidency itself.

The Odd Fellows of Wisconsin have just concluded the Grand Lodge in Milwaukee, which was well attended and of unusual interest. One of the most prominent features of the occasion was the first anniversary meeting of the Patriarchal Circle. Representatives of that degree came from far and near. The officers of that degree elected for the ensuing year, are as follows:

Supreme Venerable Orator—N. Daniels, of Milwaukee.
Supreme Orator—E. N. Kollock, of Fort Wayne, Ind.
Supreme Vice-Orator—L. P. Vordenbark, of Fort Wayne, Ind.
Supreme Counsel—L. Lockman, of Milwaukee.
Supreme Marshal—A. B. Myers, of Milwaukee.
Supreme Secretary and Treasurer—Lawrence Denner, of Milwaukee.
Supreme Guard—Joseph Schroeder, of Racine.
Supreme Sentinel—A. T. Krasell, of Milwaukee.
Supreme First Aid—D. E. Puffer, of Janesville.
Supreme Second Aid—E. H. Siver, of Milwaukee.

Trustees—For three years, Peter Van Vleet, of Milwaukee; for two years, Joseph Schroeder, of Racine; for one year, D. E. Puffer, of Janesville.

Odd Fellowship in Wisconsin is in a very prosperous condition. Among all the secret and benevolent societies that now exist in this country there is not one which is doing more substantial, good service than the Odd Fellows. It is worthy of all the success it has gained and of all the good things which have been said of it and its members.

THE FOOLISHNESS AT ALBANY.
It is very evident from what has already been done at Albany that there will be no election of two United States Senators if the present course is persisted in. There is the same breach existing, the same bitterness felt toward each other by the factions, and there is no material change in the vote from day to day. Any man who has an average amount of common sense, will see that this kind of tactics will never bring success; and yet the Republicans of the New York Legislature are trying to elect two Senators by a system which is bad, unmanly, anti-Republican, and suicidal. The Republicans of New York have a duty to perform to the country at large. They should stop fighting each other. They should stop calling names. They should put an end to this business of antagonizing either the administration or the Conkling faction. They should come down to sober work and sensible methods. They should do that which will restore harmony and make the party strong. They should have the success of Republicanism at heart rather than the success of a faction. They should go into a caucus—a time-honored plan of making

United States Senators—and solemnly pledge themselves to abide by the result. This plan would be as fair for administration men as for Conkling men, and it would secure two Republican Senators, and the humiliating family quarrel in New York, and make the Republican party of that State a unit.

It is unfortunate that there are hot heads in both sides in the Albany fight. As prominent as they are in politics, as shrewd as they are regarded to be in the management of the party, they seem to be blind and reckless in the present contest. Neither faction wants to surrender; but neither will need surrender. Let them do what common sense would dictate to do—by common consent go into a caucus and decide who shall be United States Senators. This would secure two Republicans and the fight would be ended.

But if the administration men declare that no Conkling man shall be elected, and the Conkling men pledge themselves that they will never support two administration men, then the question of electing two Republican Senators in New York, is gone to the dogs, and the Senate and New York State into the hands of the Democrats. If the factions in that State wish this result, they are now doing some very effective work. They should drop this business and remember that there has been a general blunder all round, that each faction is more or less responsible for what has been done, and knowing this, should take the safest and the quickest road to an honorable ending of the quarrel.

THE IMPORTANCE OF WASHBURN'S OBSERVATORY.

The Hon. C. C. Washburn did a noble thing for Wisconsin when he founded the Washburn Observatory, at Madison, at a cost of \$250,000. Astronomical science has also been greatly benefited by the establishment of the Observatory. It has been the good fortune of the regents of the University to secure competent professors to take charge of the great telescope which stands so grandly in the dome of the Observatory. Professor Watson was the first man to honor the position. His untimely death last November was a severe loss, not only to the State, but to astronomical science throughout the world. His place has been filled during the past few months by Professor Edw. A. Holden, who had been on duty at the National Observatory, at Washington, for several years. He is one of the brightest scientific scholars in this country, and though not yet thirty-five years old, has won an enviable reputation among the academies of sciences in Europe and America.

Professor Holden was born in St. Louis, in 1846. He graduated from the United States Military Academy, at West Point in 1870, and served a short time in the Fourth artillery. From August 1871 to June 1872, he was Assistant Professor of Natural and Experimental Philosophy at West Point, and afterwards served as Instructor in Practical Military Engineering, when he was appointed Professor of Mathematics in the United States Navy, serving at the National Observatory. He is a fit man for the place he holds as he stands among the very foremost of our astronomers. He has, as an assistant, Professor Burnham, of Chicago, who is the most successful discoverer of double stars there is in the world, and on that particular branch of astronomy is the highest living authority. These two men are intensely devoted to their business. That powerful telescope is brought into constant use every night when it is clear, from the time it becomes dark till the dawn of day. Night after night they search for new stars, making calculations, and so on, and the result of their labors is sent to all the principal observatories in the world.

Professor Holden is not only a great astronomer and a ripe scholar, but he is a gentleman of rare genial traits. He wants the people of Wisconsin to see something of the Washburn Observatory, and to see some of the planets through a telescope which is 20 feet long, weighs nearly two tons, and cost over \$10,000. The sight is one never to be forgotten, and to accommodate the people he has kindly set apart the first and third Wednesday nights of each month for the reception of the public. The people take great interest in this matter, and some nights there are as many as one hundred and fifty who improve the opportunity of looking through the telescope, and some have traveled fifteen miles to "see the sight."

The great importance, however, of the Observatory, is its relation to the State University, as the study of astronomy is thereby made thorough and practical.

A Valuable Secret.

It is related of Franklin that from the window of his office in Philadelphia he noticed a mechanic, among a number of others, at work on a house which was being erected close by, who always appeared to be in a merry humor, and who had a kind and cheerful smile for every one he met. Let the day be ever so cold, gloomy or sunless, the happy smile danced like a sunbeam on his cheerful countenance. Meeting him one day Franklin requested to know the secret of his constant happy flow of spirits. "It's no secret, doctor," the man replied. "I've got one of the best wives, and when I go to work she always gives me a kind word of encouragement and a blessing with her parting kiss; and when I go home she is sure to meet me with a smile and a kiss of welcome; and then I am sure to be ready; and as we chat in the evening, I find she has been doing so

many little things through the day to please me, that I cannot find it in my heart to speak an unkind word or give an unkind look to anybody."

THE STORM-KING.

Kansas Visited by a Very Destructive Hail and Wind Storm—Seven Persons Known to Have Lost Their Lives in its Track.

TOPEKA, Kas. June 10.—An unusually severe hail and wind storm occurred last night in the vicinity of Solomon City, in Dickinson county on the Kansas division of the Union Pacific railroad. Hailstones fell in great quantities, and of large size, some of them actually measuring ten inches in circumference. The storm extended over a strip of fine farming country about four miles wide and six long, the direction being from the northwest to the southeast. In this district everything in the shape of crops is wiped out including the fine fields of grain which were just ready for the harvest. Up to this time the following casualties are reported:

W. L. Frothingham, his wife, and George M. Combs, his farm-hand, all killed in their farm-house near Salina; D. Morgan and sister, near Solomon City, killed; two unknown men found dead on the Solomon Branch of the Union Pacific road. Six houses were demolished in the south part of Ottawa county, and several persons injured. She hail beat the crops into the ground all along the route from Salina to Abilene. The people are represented to be in great excitement on account of the lack of facilities to hear from their friends in the country who were residing in the track of the storm. It is not improbable that many others were killed or injured, as it is impossible to ascertain particulars from localities off the railroad. A correspondent at Solomon City furnishes the following account of the storm: "About 4 o'clock in the afternoon the clouds began to gather in the north and west, and to circle about and take on changing positions rapidly. At half-past 4 a small, sharp point was seen to drop down slowly three miles northeast of here, like it struck the ground, and the column continued sinking till at the base in contact with the earth measured something like forty rods across and widening gradually in a most magnificent inverted cone into heavens, then started slowly, moving to the north and east, and was watched with interest from this point till it passed out of sight. At 6 o'clock the wind began to change here in a most frightful manner, blowing a gale from every point of the compass within the space of ten minutes. Then great chunks of ice began to fall with a force that was more fearful than can be described, crashing the windows, cutting the leaves and small branches from the trees, and pounding the crops into the ground. No one who witnessed it ever saw or heard anything that equaled it."

ASSEMBLYMAN RAINES.
He Makes a Speech and Votes for Depew.
ALBANY, N. Y. June 10.—The bribery charges, whether true or false, have failed to benefit the Bucks in any manner. Depew has made important gains in every ballot since the sensation was sprung, and has suffered no loss of strength. The accession of Sipp, yesterday, was followed on the first ballot to-day by the change of Assemblyman Raines, who has been the leader of the so-called half-Back faction. He is ranked among the most influential and prominent members of the House. He has hitherto voted for Lapham and Tremaine, but has had a strong leaning toward Conkling. When his name was called, Mr. Raines asked to be excused from voting, and made a brief but very telling speech. He said he had taken special pains to discover what were the wishes of his constituents, and found nine out of every ten Republicans in Ontario county were opposed to the reelection of Conkling and Platt. He had accordingly voted for

other candidates. In conclusion he said: "From the sentiment I gathered from the leading papers of my country, and from intercourse with the people of my county, I believe that they desire a change of one with the candidates for which I have been voting. It may be a bold man, Mr. President, who makes a change at this time, in the face of certain circumstances that have occurred on the floor of this House. Yesterday there was hurled into this contest an element which, like the rushing waters of Niagara, will tear everything in all probability, before it; but, Mr. President, as these statesmen when they plunge into the abyss, are broken against the rocks and sent again to the heavens in spray, so I consider that the force of that charge, when it struck on the rock of a solid public opinion, and upon the honest and better judgment of the men of this House, was shivered in the most infinitesimal spray. I withdraw my request to be excused from voting, and vote for Chanancy M. Depew." Great applause followed.

A Renovating Remedy.
Is to be found in BURDOCK BLOOD PURIFIER. As an antidote for such headache, female weakness, biliousness, indigestion, constipation, and other diseases of a kindred nature, these blood purifiers are invaluable. Price \$1, trial size, 10 cents. For sale by A. J. Roberts and Sherer & Co.

THE CORK RIOTS.

DUBLIN, June 10.—In the conflict between the people and constabulary at Cork on Thursday, fifty civilians were injured very severely. A large number have been treated at the infirmary. Some fifty people were charged to-day at Cork in connection with the riots. About half were given terms of imprisonment ranging from one to four months each and the remainder released. The condition of affairs at Cork, combined with the attempt to blow up the town hall at Liverpool, has resulted in producing the greatest excitement in Dublin. No one knows what may next occur. But as everything is very inflammable the least spark is liable to produce a conflagration. The speech of Archbishop Crooke has had the effect to quiet somewhat the apprehensions of timid people and lead them to hope that the present crisis may pass without very serious consequences.

Gospel Truth.
He that is sure for a stranger, shall smart for it. But he that trusteth in Spina Blossom for curing liver, kidney and complaints of a like tendency, shall never be disappointed. Price 50 cents. Trial bottles 10 cents. Sold by A. J. Roberts and Sherer & Co.

WON'T TAKE A HAND.

MADISON, June 10.—Senator Sawyer was in Madison to-day to confer with the Governor in relation to the lands earned by the St. Paul, Minneapolis and Omaha railway by the completion of another installment of the North Wisconsin branch. The Governor was out of town, and the Senator left on the noon train. He said he should follow the example of ex-Senator Howe, and take no part in the make-up of the next Republican State ticket. Three of the leading candidates for Governor are his personal friends, and he says he will not help either at the expense of the others. A number of candidates on the ticket were depending on his support to help them through.

Genuine.
Many people doubt the genuineness of testimonials which are many times given by persons entirely unknown. But who will question the following one furnished by the Hon. Chas. G. Williams, member of Congress from Wisconsin: "My family has given Doan's Liver Cure a thorough and fair trial, and I unhesitatingly pronounce it worthy of all that is claimed for it by the proprietor."

ELEVATOR BURNED.

ST. PAUL, June 10.—The elevator owned by the Chicago, Milwaukee & St. Paul company was burned at Fairbault to-day. It contained about 50,000 bushels of wheat, mostly owned by Pratt & Robinson, who had an insurance of \$15,000.

AN AX ARGUMENT.

DEBUIQUE, June 10.—It was reported to-night that two men had a dispute to-day at Cassville, Wis., over a fence, when one split the others head open with an ax, causing instant death.

NOT SO BAD.

MILWAUKEE, Wis. June 10.—A private dispatch from Toronto states that the loss of the Western Assurance of that city by the fire at Quebec was under \$15,000, not \$200,000, as has been reported.

THE HUMAN HAIR.

How to Preserve and Beautify it.
Many persons abuse this delicate and beautiful ornament by burning it with alcoholic washes and plastering it with grease, which has no affinity for the skin, and is not absorbed. BURNETT'S COCAINE, a compound of Cocaine Oil, etc., is unrivaled as a dressing for the hair—it is readily absorbed, and is peculiarly adapted to its various conditions, preventing its falling out and promoting its healthy growth. Housekeepers should insist upon obtaining BURNETT'S FLAVORING EXTRACTS, for they are the best.

STATE OF WISCONSIN—COUNTY COURT FOR ROCK COUNTY.—In probate.

Notice is hereby given that at a special term of the county court to be held in and for said county at the court house, in the city of Janesville, in said county, on the second Tuesday of July, A. D. 1881, at 9 o'clock a. m., the following matter will be heard and considered: The settlement of the account of A. J. Roberts as administrator of the estate of Jeremiah Roberts, deceased, late of said city, and the order of assignment.—June 10th, 1881.

By the court, AMOS P. PRICHARD, County Judge.

Woman's Position in England.
The English husband considers himself the ruler of the house and all that is therein. He believes in the Scripture injunction, "Wives, obey your husbands." He does not favor any of the ideas of feminine independence which prevail to a certain extent in America. I have heard of his saying to his spouse: "Don't think you can run away from me. Try it on, and you'll find the law on my side, with a policeman to take you home again; for you're my goods and my chattel! What's mine may be yours in the theoretical marriage service, but what's yours is now legally mine."
Woman in England is trained to acknowledge this ownership and authority of her lord and master to an extent little realized here. I heard once of a young lady expecting soon to be married remark: "But I do not think Mr. would ever beat me." Her manner seemed to imply that Mr. might, in some tremendous emergency, beat her. These were people of good social position. Among the "lower classes" wife-mauling is too common for very serious consideration, and when the victim of these masculine privileges makes her appearance in the Police Court, charged with a black-and-blue jelly, and appeals for protection to the Magistrate, his Honor generally advises her to "go home and try" to live peaceably with her connubial brute.
It surprises the American women in London to observe how Englishmen, and well-dressed Englishmen, too, will, in a crowd coming out of the theater, walk straight over a woman unless she gets out of the way. There is with them no varnish of man's shadow turning. Some years since when in London I met Mrs. Crabtree, Lotta's mother, who is by birth an Englishwoman. I heard from her lips a stirring philippic on the lack of respect and deference in England toward women. The lady had lived so long in America that the customs of her native land had all the surprise, if not the charm, of novelty for her. Walking one night in a London fog at the West End, I lost my way. Just ahead of me was a man, and just behind me a young woman. I inquired my way of the man, and he, being ignorant, in his turn inquired of the young woman. But first, in order to attract their attention, he prodded one in the back with the end of his umbrella. I venture to say that the veriest rowdy in New York would not have taken, under the circumstances, such a liberty with any woman in the street. The style of this man's dressing to the prodded girl was in keeping with the prod. Said he: "Give tell us the way to 'street." The girl promptly told him, and seemed to regard the prod as a matter of no moment. Any Irish servant girl with six months' experience in New York would on such treatment have set her brother, the policeman, or her cousin, the Alderman, after the prodder with a club. But in America we know how to educate women to demand and enforce for themselves proper respect. The young Englishman also made a growing error in this matter. Poor fellow, it is not his fault. Up to the age of eighteen or twenty the rigid social law brings him in little contact with the other sex, or rather with the better portion of the other sex. He is sent to school and herds with boys. What respectable female association he may have is of a restricted character. Compared with the American young man of the same age, he is apt both in his estimate and treatment of his countrywomen to be very verdant, unlogged and awkward. He affords the best of subjects for a victim. He is no match for a clever girl, especially a clever American girl. He mistakes her openness and candor, and then cannot understand why he is rebuffed. His corner flirtations, if we choose to term them such, have been principally with women of a lower class, and he cannot understand why freedom and self-reliance does not mean license. When he goes into society he may be found in marriageable girls flung by the dozen at him, if he be a desirable party. This repels him. What he wants is the individual young woman, by herself, and not with the eternal mother-in-law watching and waiting at her back. Of course he must marry sooner or later, and money and family prove bonds of cementation. The proper thing to do in this matter is to internationalize marriage between England and America. The present large and increasing surplus of American girls should be sent to England under protection of their country's flag. There they would work havoc with many desirable young Englishmen. Then the English girls would be brought over and marry Americans. The English girls would give the American refinement and polish; the American girls would give the English husbands a live idea of the respect due woman's individuality. The generation developed in England from such union would be very potent in upsetting their Goggs and Magogs of custom, caste and precedent, which prevail for no earthly reason save that they have prevailed. Yes; that's what must be done.—*Prattice Mulford, in San Francisco Chronicle.*
The Czarina.
The beautiful and charming woman elevated by the death of an Emperor to the tragic throne of Russia, says *Le Figaro*, was called in the happy hours of her early youth the Princess Dagmar, Daughter of the sea King, sister of the Princess of Wales, brought up by the Queen of Denmark, a most perfect woman, the Princess Dagmar inherited beauty from her race, domestic virtues from her education, courage and charity from her heart, wit from God.
Ninety millions of people are even now lifting their eyes to this Empress-figure, which appears to them like the star of the morning, the aurora of a reign of peace and justice. She holds in her hand the least of the Emperor and the destinies of Russia.
Lithely built, slender and noble by nature's gifts, with a carriage of the head which makes her seem taller, the young sovereign has silky chestnut hair, delicate features, a complexion of dazzling purity, strong lips emphasizing the kindly expression of her face and making her smile sweeter, and eyes impossible to describe—deep, velvety, soft, luminous, full of soul, now thoughtful, now beaming—eyes which fascinated Thiers and compelled him to exclaim: "She is truly the eagle's mate!"
She rides like a Queen of the Amazons. During the military maneuvers she accompanied her husband everywhere. In their trips to the camp of the Cossacks of the Don, the Czarina often wore the uniform of an officer of those valiant legions, and followed the Czarowitz like a young ad-de-camp.
Alexander III. is a musician. She adores music like the fair Dane that she is. Is not the Baltic coast the land of the sirens of the north?
She has always been very fond of dancing, and at court balls often remained up till morning, dancing with her brothers-in-law and her brother's aides-de-camp.
She is also one of the best skaters possible to conceive—a sylph in furs and sealskin cap. She always produced the effect of an apparition, so aerial is that grace of hers.
Handling Bees.
Occasionally we hear of some one going about the country selling a bee charm. The vender says that if we only have this wonderful preparation we can handle bees with impunity, and never get stung. These so-called bee charms are of no value, unless it is the one who sells them. I can tell the true secret of subduing and handling bees. A bee will never sting when it is full of honey, unless it gets pinched. It is like a man just after he has eaten his dinner; he is good natured. One can poke such a bee around considerably without its getting angry.
When bees are alarmed, the first thing they usually do is to fill themselves with honey. If one should wake up in the night and find the house in flames, he would probably lead himself with the most valuable articles that he could lay hands upon. So if one blows a puff or two of smoke into the entrance of a hive, the bees do not know but that their house is on fire. If one closes the hive, and then raps on the side of it, the bees think, perhaps, that their house is about to tumble down. In either case the first thing they do is to secure a load of honey, which is probably the most precious substance known to them.
In order, then, to handle bees safely, it is only necessary to smoke them a little, give them time to fill themselves with honey, and then open the hive carefully and handle the bees decently. They will usually be as harmless as house flies. Light one end of a roll of cotton rags, or a piece of dry, rotten elm or basswood, and it will be found a good thing with which to smoke bees. If there are many hives, a "smoker" will be found a great convenience. It is a little, round tin stove, about three inches in diameter and six in height, and just one end of a roll of cotton rags, or a piece of dry, rotten elm or basswood, and it will be found a good thing with which to smoke bees. If there are many hives, a "smoker" will be found a great convenience. It is a little, round tin stove, about three inches in diameter and six in height, and just one end of a roll of cotton rags, or a piece of dry, rotten elm or basswood, and it will be found a good thing with which to smoke bees. If there are many hives, a "smoker" will be found a great convenience. It is a little, round tin stove, about three inches in diameter and six in height, and just one end of a roll of cotton rags, or a piece of dry, rotten elm or basswood, and it will be found a good thing with which to smoke bees. If there are many hives, a "smoker" will be found a great convenience. LOCAL MATTER.

Ladies' and Gents' Stationery.

For a good article of Writing Paper, Envelopes, Pens, Ink, etc., at reasonable prices, call at Sutherland's Bookstore.

Go to A. J. Roberts for Mrs. Freeman's New National Paper. For brightness and durability of color are unequalled. Color from 2 to 5 pounds. Price, 15 cents.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere 25 cents a bottle.

—The St. Patrick's Total Abstinence and Benevolent Society is to celebrate the Fourth of July by a picnic, in Patton's grove, and those who wish a happy time should join with the picnicers, take part in the games, eat some of the delicacies, and have a good time generally; and to crown the work, go to Apollo hall in the evening, where a merry dance will be given by the society. Anderson's band is to furnish the music.

—Smith & Bostwick are receiving large lots of new goods. By the way the boxes and bales are being tumbled into their store it don't look as if they would ever sell them all, but when one sees the way they are tumbled out again, and carried off by the rush of customers, it don't seem as if they could get goods enough. It's a busy place, and the firm don't seem to know what dull times mean. Their stock is now in fine shape and in quality and quantity they can satisfy all.

—The moon promises a "break o' day" entertainment to-night, and those romantic souls who can't think of any other excuse for sitting up late, or rather early, can lay it to the moon and the eclipse. The almanac presents the following time table by which the moon will run in this vicinity to-night: Moon enters penumbra, 10:25; enters shadow, 11:21; total eclipse begins 23 minutes past midnight; middle of eclipse, 1:04; total eclipse ends, 1:45; moon leaves shadow, 2:46; moon leaves penumbra, 3:42. Of course most of the young folk will want to stay up until the eclipse begins to weaken.

—Rev. G. W. Lawrence placed upon our table a long stalk of winter wheat, plucked June 6, by his son E. E. Lawrence, in Russell county, Kansas. It measures four feet, nine inches, and is well headed. The field of forty acres from which this was plucked will yield, it is thought, at least twenty-five bushels to the acre. There has been plenty of rain in Western Kansas, this season, and crops are looking finely, and the farmers of that section are jubilant. E. E. says the wheels are thriving as well as the crops, and it costs twice the labor to care for the corn crop this season that it did last year.

HOMER AGAIN.

St. Patrick's Temperance Band Returns from Oconto. The Delegates of the Convention—Rev. Father McGinnity, President.

Shortly after 7 o'clock this morning the train from the north arrived, bringing back St. Patrick's Temperance band, which has been to Oconto to attend the tenth annual convention of the Catholic Total Abstinence Union, of Wisconsin. The band marched from the depot to their room, discoursing lively music, and then dispersed, having been together on the trip since last Monday. They report an enjoyable time in all respects, and speak highly of the treatment which they received. Yesterday afternoon, before leaving for home, they serenaded the Mayor of Oconto, and were given a receipt in and sumptuous feast by him. There were three bands in the parade made at Oconto, and the Janesville band received its full share of the honors of the occasion.

At the convention there were fifteen societies represented. Resolutions were adopted expressive of thanks to the Bishop, officers of the society, and to others for the interest shown by them, and for courtesies shown the convention, and the following resolutions of more general interest were adopted:

Resolved, That it is the sense of the convention that each society be expected to have one lecture a year, and that they defray expenses of same.

Resolved, That each society establish a cadets' society during the year, and report success of same at next annual convention.

The following delegates were appointed to attend the national convention at Boston: Rev. P. P. Cooney, of Watertown; and Rev. Father O'Malley, of Oshkosh.

The election of officers resulted as follows:

President—Rev. Father McGinnity, Janesville.

Vice Presidents—Rev. Father O'Malley, Oshkosh; Rev. Father Cooney, Watertown; Rev. Father Willard, Whitewater; James A. Don Levy, Oconto; Rev. Father Fox, Green Bay; Rev. Father Cleary, P. Quinn, Janesville.

Treasurer—E. J. Wall, Marinette.

Secretary—R. P. Boland, of Green Bay.

Sergeant-at-arms—J. D. Logan, White-water.

It was decided to hold the next annual convention at Whitewater.

IF "cleanliness is the seal of civilization," Janesville must stand high on the scale, judging from the immense quantities of toilet soaps Prentice & Evenson have just received. For pure vegetable oil soaps go to the drug store opposite the post office.

Druggist's Testimony.

H. F. McCarthy, druggist, Ottawa, Ont., states that he was afflicted with chronic bronchitis for some years and was completely cured by the use of THOMAS' ELECTRIC OIL.

Sold by A. J. Roberts and Sherer & Co.

THE WEATHER.

REPORTED BY PRENTICE & EVENSON, DRUGGISTS.

The thermometer at 6 o'clock last night stood at 76 degrees above; at 1 o'clock a. m. to-day at 58 degrees above; at 7 o'clock a. m. at 64 degrees above, and at 1 o'clock p. m. at 74 degrees above. Cloudy.

The indications to-day are, slightly warmer and fair weather, followed by increasing cloudiness, possibly by local rains, variable winds, mostly southeasterly and lower barometer.

A LONG STRETCH.

Frank Noonan, the young man from Madison, convicted of rape, had his case under consideration in the circuit court to-day. The motion for a new trial was overruled, as was also a motion for arrest of judgment until the question of the jurisdiction of the court could be certified up to the Supreme court and a

decision had. It appears that there are some doubts about the court here having jurisdiction in the case on account of there being some alleged defect in the sending of the case from the municipal court in Madison to the Dane county circuit court, from which court a change of venue was taken to Rock county.

If the Supreme court should decide that the Rock county court had not jurisdiction, the case would go back to the municipal court at Madison, and a new trial would result. Judge Conger decided not to stay sentence for this question to be passed upon, and proceeded to pronounce the young man's doom, which was that he be confined at hard labor in the State prison for ten years, that being the lowest term under the law, the highest being thirty years. His attorneys will present the matter before the Supreme court, in the hope of securing a new trial, but in the meantime he will be serving out a part of the time allotted him.

SUNDAY SERVICES.

The Delegates Arranged for the Banquets to-morrow.

The following are the announcements of services to be held in the several churches of the city:

CONGREGATIONAL CHURCH—Corner of Jackson and Dodge streets. Rev. T. P. SAWIN, Pastor. Services, 10:30 A. M. and 7:30 P. M.

Rev. D. D. Hill, of Beloit, will preach at the First Congregational church to-morrow. Mr. Hill is an earnest and enthusiastic speaker and his theme is of especial interest, "Education and its relation to the church." Rev. Mr. Sawin will give the usual children's sermon. A cordial welcome is extended to everybody.

PRESBYTERIAN CHURCH—On Jackson street. Rev. W. F. BROWN, Acting Pastor. Services, 10:30 A. M. and 7:30 P. M.
